# Fangyi Chen

Tel：(412) 417-5016 E-mail: fangyic@andrew.cmu.edu
Address: 4720 Forbes Avenue, Pittsburgh, PA, USA 15213

## Research Interests

- Deep learning based computer vision for real-world AI applications
- Generic object detection, AI for retail, Multi modalities

## Education

- Ph.D. candidate in Electrical and Computer Engineering — 2020-present
  Carnegie Mellon University — Pittsburgh, USA
  Advisor: Dr. Marios Savvides

  M.S. in Electrical Engineering — 2017-2018
  University of Pittsburgh — Pittsburgh, USA

- B.E. in Electrical Engineering and Its Automation — 2013-2017
  North China Electric Power University — Beijing, China

## Patents

[1] WO-2022211995-A1 *System and method for using non-axis aligned bounding boxes for retail detection*

[2] WO-2020210825-A1 *System and method for detecting products and product labels*

[3] US-2022044073-A1 *Feature pyramids for object detection*

[4] US-2022058425-A1 *System and method for the automatic enrollment of object images into a gallery*

[5] US-2022262101-A1 *System and method for solving missing annotation object detection*

[6] WO-2022173607-A1 *Fast object search based on the cocktail party effect*

[7] WO-2022173621-A1 *System and method for improved few-shot object detection using a dynamic semantic network*

[8] WO-2022109295-A1 *System and method for detecting and classifying abnormal cells*

[9] US-2022058432-A1 *Few-shot object detection using semantic relation reasoning*

## Professional Experience

**Academic Service**

- **Journal Reviewer:** IEEE TIP, Pattern Recognition, TGRS, Neural Computing, Visual Computer, Connected Science
- **Conference Reviewer:** CVPR 2023, ICCV 2023

**Research Assistant (01/2020-present) & Research Associate III (2019) @ Cylab, CMU** 02/2019-present

- **AI for Retail:** A real-time system for store management and automatic checkout. Lead a team for large-scale dataset collection and annotation. Develop RetailDet, a quadrilateral product detector that achieves top performance on three retail datasets, and a textually enhanced product matching algorithm that operates in a one-shot manner. The system is deployed in stores of the world's largest retailers. Research results are turned into patents.
- **Anchor-free object detection:** A progressive design of anchor-free object detection aims to address the inherently heuristic feature selection of anchor-based detectors. They are developed with novel ground-truth assignment strategies on feature map and across feature pyramid via multi-level feature selection, norm calibration, and soft-weighted training losses. Research results are turned into patents.

**Selected Project @ ECE, UPitt** 09/2017-03/2018

- **EXGbuds:** The development of a wearable device to measure eye movements and facial expressions to generate useful commands via non-invasive biosensors. The research result is adopted by EXGwear Inc.

**Selected Project @ High Voltage Research Institute, NCEPU** 04/2016-02/2017

- **IGBT**: Examining external insulation characteristics of Insulated Gate Bipolar Transistor. Design and creation of a low energy 100kV impulse generator for the polyimide electric breakdown experiment.

## Skills

- Deep learning and computer vision
- Python, C++, Matlab, CAD
- Power system analysis

## Awards

- Carnegie Institute of Technology Dean's Fellowship, Carnegie Mellon University 2020
- Best Hardware Hack, PITT-CTSI GitHub Major League Hacking 2018
- National Third Prize, Chinese National College Students Competition on Energy Economics 2015
- University Merit Student, NCEPU 2014
